SureNav Remote Navigational Audits

New Member Benefit for Bridge Team Management

To assist Members with their bridge team management, North P&I Club has partnered with SureNav to offer Members a 45% discount on a package of five remote navigational audits.

North P&I Club is committed to promoting safety on board vessels and we frequently analyse high-value admiralty claims that arise from collisions, groundings and other similar incidents. One of the most influential contributory factors to these incidents is a failure in bridge team management.

SureNav is a UK based company, dedicated to promoting safe navigation and to improving standards across shipping. They have been conducting remote navigation audits for some time and are pioneers in the field, working alongside OCIMF and other industry leading parties to pave the way for the use of this facility.

Through taking advantage of the partnership discount, North's Members will benefit from the following:

- Five remote navigation audits, all conducted by experienced master mariners.
- Remote navigation audits use voyage data recorder (VDR) data alongside supporting evidence such as copies of the charts used, checklists, log entries and voyage plans.
- Evaluation of compliance with procedures in the vessel's safety management system.
- The audits can be used at any time, on any vessel.
- A full report will be issued for each audit, complete with and any support material (video or sound files).

For more information, please [click here](#) to view or download the promotional flyer.

If you have any questions, please let me know. If you would like to go ahead and register your interest, please contact SureNav directly on: support@surenav.com
